

**9- How to make a drawing or logo
at the keystone facing?**

Creative Options

Add distinctive detail to any Keystone retaining wall. For subtle design accents vary the texture of units in geometric patterns while maintaining the Keystone unit color choice. Texture combinations can be sculptured rockface mixed with straight split units, smooth face units or corduroy units. Dramatic accents can occur when combining units of complimentary and or contrasting color schemes. Consult your local manufacturer/distributor for standard colors, custom color availability, pricing and unit texture options available by region.

Additional options:

- » Mixture of units of different heights. (i.e. 8 inch (200mm) & 4 inch (100mm) combinations)
- » Specific graphic emblem. (i.e. State shape logo - Texas, Illinois, etc...)
- » Various bonds (Flemish), diagonal bars, geometric repeats, horizontal bands, stair step bands, etc...

Use these features to coordinate the site landscape retaining walls with accents on building architecture (i.e. belt courses, bands and geometric details).
